March 28, 2006	

TO:	Ms. Linda Wilhoit, Principal
	Dave Thomas Education Center

- FROM: Robert J. Krickovich, Coordinator, LEA Facilities and Construction Management, Environmental Division
- SUBJECT: Indoor Air Quality (IAQ) Assessment FISH 108, 109, 111 and 131

On March 15, 2006 I conducted an assessment of FISH 108, 109, 111 and 131 at **Dave Thomas Education Center – Main Campus**. This evaluation included observations of the flooring system, ceiling tiles, false ceiling plenum, environmental surfaces, interior and exterior walls, and the accessible ventilation equipment. Additionally, environmental parameter measurements were taken to include temperature, relative humidity, and carbon dioxide. The detailed findings, along with the recommended corrective action can be found on the attached IAQ Assessment Worksheets.

Generally, the IAQ Assessment did not identify any existing conditions significantly impacting IAQ and thereby presenting immediate health and safety concerns to building occupants. However, due to individual sensitivities and predisposing health factors, it is possible that some building occupants may elicit a health response to agents and / or conditions identified during the evaluation. Therefore, to further improve IAQ, prevent development of future IAQ-related problems, and to reduce the potential for IAQ-related complaints by building occupants, the IAQ Assessment Team recommends appropriate follow up of each item identified and listed in the attached evaluation.

Should any questions arise, or if the current concerns continue after the attached recommendations have been addressed, please feel free to contact me at 754-321-1638.

cc: Dr. Harry LaCava, Area Superintendent
Fran Bolden, Area Director
Jeffrey S. Moquin, Director, Risk Management
Philip Kaufold, Project Manager, Facilities and Construction Management
Jamie Daniels, Broward Teachers Union
Mark Dorsett, Manager 1, Physical Plant Operations Division, Zone 1
Roy Norton, Manager Custodial/Grounds, Physical Plant Operations Division

Findings:

- No visible signs of water intrusion or microbial growth

- Teacher indicated that HVAC was not working, but environmental parameters were acceptable at the time of the assessment. HVAC mechanic from zone 1 was on site at the time of the assessment and he indicated that the unit is working and that the equipment has been checked several times and there is no problem.

- HVAC filter not installed properly

Recommendations:

Site Based Maintenance:

- Remove and reinstall HVAC filter properly
