TO:	Ms. Donna Morrison, Principal Country Hills Elementary School	
FROM:	Edward See, Project Manager Risk Management Department	
SUBJECT:	Indoor Air Quality (IAQ) Assessment FISH 511 and 602	

For Custodial Supervisor Use Only						
	Custodial Issues Addressed					
	Custodial Issues Not Addressed					

On September 2, 2008 I conducted an assessment of FISH 511 and 602 at **Country Hills Elementary School**. This evaluation included observations of the flooring system, ceiling tiles, false ceiling plenum, environmental surfaces, interior and exterior walls, and the accessible ventilation equipment. Additionally, environmental parameter measurements were taken to include temperature, relative humidity, and carbon dioxide. The detailed findings, along with the recommended corrective action can be found on the attached IAQ Assessment Worksheets.

Generally, the IAQ Assessment did not identify any existing conditions significantly impacting IAQ and thereby presenting immediate health and safety concerns to building occupants. However, due to individual sensitivities and predisposing health factors, it is possible that some building occupants may elicit a health response to agents and / or conditions identified during the evaluation. Therefore, to further improve IAQ, prevent development of future IAQ-related problems, and to reduce the potential for IAQ-related complaints by building occupants, the IAQ Assessment Team recommends appropriate follow up of each item identified and listed in the attached evaluation.

Please ensure that your Head Facilities Serviceperson receives a copy of this correspondence so that the recommendations requiring their attention can be addressed. Within two weeks a representative from the Custodial/Grounds Department will conduct a follow-up visit to ensure that all issues have been appropriately addressed.

Should any questions arise, or if the current concerns continue after the attached recommendations have been addressed, please feel free to contact me at 754-321-3200.

511	74.6 7	2 - 78	51.9	30% - 60%	1295	Max 700	> Ambient	21
Noticeable Oc	dor No		'isible water age / staining	Visible micro g? growth?	obial Am	ount of ma affected	terial	
Ceiling Type	2 x 4 Lay	In	No	No			None	
Wall Type	Plaster/Dry	wall	No	No			None	
Flooring	12 x 12		No	No			None	
	Clean	Minor Dust / Debris	Needs Cleaning		Corrective	Action Re	equired	
Ceiling	Yes	Νο	No					
Walls	Yes	No	No					
Flooring	Yes	No	No					
HVAC Supply	Grills Yes	No	No					
HVAC Return	Grills Yes	No	No					
Ceiling at Sup Grills	oply Yes	No	No					
Surfaces in R	oom Yes	No	No					

Observations

Findings:

dehumidifier in room

- 4 potted plants in room

Recommendations:

Site Based Maintenance: - Remove potted plants from room. Soil is a source of microbial growth. - Continue to monitor this location for any signs of microbial growth as well as dust and debris accumulation and clean as appropriate
