Risk Management Department

SUBJECT: Indoor Air Quality (IAQ) Assessment

FISH 132 and 138

On September 5, 2006 I conducted an assessment of FISH 132 and 138 at **Sunrise Middle School**. This evaluation included observations of the flooring system, ceiling tiles, false ceiling plenum, environmental surfaces, interior and exterior walls, and the accessible ventilation equipment. Additionally, environmental parameter measurements were taken to include temperature, relative humidity, and carbon dioxide. The detailed findings, along with the recommended corrective action can be found on the attached IAQ Assessment Worksheets.

Generally, the IAQ Assessment did not identify any existing conditions significantly impacting IAQ and thereby presenting immediate health and safety concerns to building occupants. However, due to individual sensitivities and predisposing health factors, it is possible that some building occupants may elicit a health response to agents and / or conditions identified during the evaluation. Therefore, to further improve IAQ, prevent development of future IAQ-related problems, and to reduce the potential for IAQ-related complaints by building occupants, the IAQ Assessment Team recommends appropriate follow up of each item identified and listed in the attached evaluation.

Should any questions arise, or if the current concerns continue after the attached recommendations have been addressed, please feel free to contact me at 754-321-3200.

Sunrise Middle School					Evaluation Requested September 5, 200					
Time of Day	1:10 pm				E	Evaluation Date	September 5, 2006			
Outdoor Condition	s Temper	ature 7	6	Relative Humidity	93.7	Ambie	nt CO2 316			
Fish Tem	perature Rang	ne Relati	ve Humidity	Range	CO2	Ran	qe # Occupants			
132	67.8 72 - 7		64.7	30% - 60%	549		> Ambient 4			
Noticeable Odor	No		sible water age / staining	Visible micro? growth?		Amount of mat	erial			
Ceiling Type	2 x 4 Lay In		No	No	ĺ		None			
Wall Type	Drywall		No	Yes	Yes		Southwest & Southeast wall			
Flooring	Tile		No	No			None			
		inor Dust Debris	Needs Cleaning		Correc	ctive Action Re	quired			
Ceiling	Yes	No	No							
Walls	No	Yes	Yes	С	Clean with Wexcide disinfectant					
Flooring	Yes	No	No							
HVAC Supply Grill	HVAC Supply Grills No Yes Clean with Wexcide disinfectant									
HVAC Return Grills No Yes			Yes	Clean with Wexcide disinfectant						
Ceiling at Supply Grills	Yes	No	No							
Surfaces in Room	Yes	No	No							
Dbservations										
Findings: - Visible microbial growth on Southwest and Southeast wall of media center - Dust and debris on HVAC supply and return grills - Temperature was low and humidity level was slightly elevated at the time of the assessment Recommendations: Site Based Maintenance: - Thoroughly clean walls with Wexcide disinfectant solution - Clean HVAC supply and return grills with Wexcide disinfectant solution - Adjust the thermostat to increase the temperature which will also lower the humidity level - Continue to monitor this location for any signs of microbial growth as well as dust and debris accumulation and clean as appropriate
