

TRENCH AND EXCAVATION RESCUE TECHNICIAN LEVEL

CLASS DATE: March 7th & 8th, 2019 0900 - 1800 hours

WHERE: Broward Fire Academy

DESCRIPTION:

This course meets or exceeds the general requirements of NFPA 1670 "Standard on Operations and Training for Technical Rescue Incidents," Trench Rescue, Awareness, Operations, and Technician Level. Regulations and standards outlined in OSHA 1926, and NFPA 1006, "Standard for Rescue Technician Professional Qualifications," Trench Rescue will be explained and applied.

This program will address:

- Scene Management and implementation of a trench rescue emergency action plan
- Collapse indicator recognition and scene safety surveys
- Atmospheric testing & monitoring, ventilation, and de-watering operations
- Shoring system construction and installation, including lumber, screw-jacks, and pneumatic systems
- Construction of load stabilization systems
- Intersecting trench rescue operations
- Patient access, medical considerations, patient, packaging and extrication techniques

Participants must provide a "Trench Rescue, Operations Level" certificate to register for this class. Performance of all required practical skills as outlined in NFPA 1006, Trench Rescue, are necessary in order to receive a certificate. This is a performance and skill driven class; daily class times are for reference only.

Students are required to provide their own helmets, gloves, steel toe boots, safety glasses, knee and elbow pads, headlamps and/or flashlights. Personal equipment must comply with NFPA and ANSI.
