CAUTION:

Due to the new district progression charts, many students may default to core classes above their desired level. It is VERY important that the students have received teacher input to the proper course they should choose for the upcoming year. Keep in mind that if a student takes a very rigorous schedule and two weeks into the school year, feels as if they can not handle the course load, there will be no schedule changes granted simply because there will be no openings in core subjects at any level. They will remain in the selected courses for at least a semester, maybe longer, depending on CLASS SIZE restrictions. Please choose wisely!
