			yet	В	A	Fully	
2.	Short-and long-term efforts to implement and improve inclusive educational practices, as measured by the BPIE, are included in the SIP.	 The school has developed an action plan indicating goals related to inclusive practices, which are included in the SIP. The leadership team reviews and shares the language and intent of s. 1003.57 4(F), F.S., with all staff and stakeholders. Once every three years, the school completes a BPIE assessment and reports the results of all planned short- and long-term improvement efforts to the district. The school leadership team analyzes data quarterly to monitor and evaluate progress toward meeting SIP goals related to inclusive practices in the school. All stakeholder groups are represented and involved in a collaborative system of decision making to implement and improve inclusive practices across the school, as noted in the SIP. The school provides access to the SIP on the school website and on request in the front office. The school handbook or website includes information on the school's process of shared decision making. Family input on inclusive practices is gathered in a variety of ways (surveys, interviews, focus groups, etc.). 					SAC composition, PSD trainings

Suggested Measures: Copy of SIP, including distribution process (e.g., website, front office request form), data reports, meeting notes and schedule, roster and schedule of school leadership team meetings showing diverse representation.

Note: *It is recommended that the team table and return to this indicator after the entire BPIE assessment has been completed. Please see the Appendices: Glossary of Terms and Resources sections for information about the terms found above: stakeholder groups and s. 1003.57 4(F), F.S. Schools that have specific goals related to the BPIE indicators currently identified in their SIP would rate themselves as Partially implemented. Schools that have not included goals related to the BPIE indicators in their SIP would rate this indicator as Not Yet.

			yet	В					
4.	School administrators advocate for all SWDs to have the same school choice options as students without disabilities to ensure all SWDs receive educational services in their neighborhood school or school of choice.	 The principal contacts the district to obtain information about SWDs who do not attend the school because of the type or severity of their disability or perceived lack of services available at the school. The principal requests services and supports to follow SWDs in the school. The school has a diverse student population that reflects the full range of students who live in the neighborhood school zone, including those with significant disabilities. The school is equipped to provide educational services to all students. Families perceive the school as being able to address their child's needs, regardless of the type or severity of disability. 							
Suggested Measures: Documentation of school administrator requests for information (e.g., emails, memos) to the district office, roster of SWDs in school's zone who are not attending the school.									
allocat	Note: Aligns with District BPIE Indicator #3. This indicator addresses the practice of placing SWDs in schools based primarily on exceptionality, label or services needed, rather than identifying and allocating resources for all SWDs to receive educational services in their neighborhood school or school of choice. Students who are transported to attend other schools are at risk of disenfranchisement from the communities within which they live and lack opportunities to build natural relationships among the students in the assigned school. With the practice of placing SWDs								

at schools based on their exceptionality, unintended consequences include further isolation of students with significant disabilities and barriers to scheduling SWDs into heterogeneous classrooms that have natural proportions of students with and without disabilities. Please see the Appendices: Glossary of Terms section for definition of the above term natural proportions.

5.	School data reflect that all SWDs, regardless of the type or severity of disability, receive their education and related services in age-and grade- appropriate, heterogeneous, general education contexts 80% or more of the day.	 All SWDs, including those with significant disabilities, are scheduled into general education classes 80% or more of the day. All SWDs receive education in a general education regular class setting reflecting natural proportions and age-appropriate, heterogeneous groups in core academic and elective or special areas within the school community, as stated in s. 1003.574(F), F.S. SWDs are not assigned to classrooms based on their exceptionality or supplementary aids and services needed. SWDs are not assigned to classrooms based on a perceived lack of resources at the school. All teachers ensure that every student feels welcome and achieves to his or her potential in general education classes and other natural contexts. All SWDs are involved in before- or after-school tutoring interventions provided for reading and math. Support services personnel have caseloads that allow for flexible scheduling of services to SWDs in general education classes and other settings. To the greatest extent possible, related services are scheduled and provided to SWDs in general education and natural contexts, rather than in segregated settings, for example: o A speech-language pathologist (SLP) in an elementary school engages in sma 					Support services are scheduled to consult or collaborate; related services are scheduled; course schedules are reviewed		

Suggested Measures: School-level least restrictive environment (LRE) data showing the percentage of time each SWD, disaggregated by exceptionality, spends in age- and grade-appropriate, heterogeneous, general education contexts

Note: Aligns with District BPIE Indicator #12. Please see the Appendices: Glossary of Terms section for definitions of the above terms: related services, Individual educational plan (IEP), agappropriate heterogeneous groups and supplementary aids and services.

			yet B A		Fully			
6.	School data reflect that all SWDs, ages 3-5, receive special education and related services in the regular early childhood (Pre-K) and kindergarten classes with peers without disabilities. *Schools with Pre-K programs only	 School administrators collaborate with the district to establish programs that include students with and without disabilities in the same early childhood and kindergarten classes. The school has targets to increase the number of SWDs, ages 3 - 5, who receive special education and related services in inclusive classes with peers without disabilities. General and special education teachers regularly collaborate to plan and implement weekly lessons based on Florida standards for Pre-K and kindergarten. Curriculum adaptations, such as changing the physical or social environment, placing materials in optimal positions or heights, breaking down steps in a task, assistive devices, alternate materials, etc., are considered as easy-to-implement interventions All children receive supports and interventions necessary to ensure developmentally appropriate progress prior to referral for special education services and programs. Developmentally appropriate behavior supports are provided for students. The school regularly monitors (e.g., monthly) the number and progress of SWDs, ages 3-5, who receive special education and related services in inclusive settings with peers without disabilities. 						
	Suggested Measures: Schedules of SWDs, ages 3-5, indicating the location(s) where related services are provided to those students. Data showing the percentage of time each SWD, ages 3-5, spends with same-age peers without disabilities. Teacher lesson plans indicating appropriate curriculum adaptations or interventions for SWDs in the general education, early childhood curriculum.							
Note: Aligns with District BPIE Indicator #4. Please see the Appendices: Glossary of Terms for definition of the above term: curriculum adaptations. Partnerships with private providers may be necessary.

			yet	В	Α	Fully			
7.	School administrators communicate expectations for all school personnel to share responsibility for all of the students in their building and consider all SWDs as general education students first.	 Administrators clearly and consistently articulate the following expectations for all school personnel during faculty meetings, School Advisory Committee meetings, PLCs, staff newsletters, etc.: General and special education teachers are expected to share instructional and behavioral support responsibilities for SWDs in each classroom and other school settings. SWDs are not the sole responsibility of special education personnel during academic and non-academic school activities. School personnel refer to special education teachers by name rather than exceptionality of students on their caseload (e.g., Mrs. Smith rather than the Autistic Teacher). All school personnel are trained and responsible for safety and evacuation procedures for SWDs. Administrators provide written rationale and other resources (e.g., research articles, newsletters, websites) with information and strategies on inclusive practices. Administrators review staff schedules to ensure all personnel have opportunities to support students with and without disabilities. Administrators ensure that all personnel are responsible for and understand the health and safety procedures for all students, especially those who have extensive support needs. 					Administrators, ESE Specialist and ESE teachers are on agenda during the pre-planning week to go over expectations relating to SWDs. ESE teachers meet with PLC groups and review student data. Administration communicates with ESE staff regarding evacuation procedures.		
Sugge	ested Measures: Results of surveys, self-as	sessments, questionnaires, interviews and teacher schedu	les.						
Note: School leaders are critical in setting and maintaining a vision for inclusive education with all personnel and across all school classrooms and settings. Creating a climate of shared responsibility for all students in the school is a cornerstone of inclusive education.

8.	School administrators facilitate the use of resources, by school personnel, to implement best practices for inclusive education for all SWDs.	 School administrators obtain and allocate resources (e.g., personnel and materials) to implement effective inclusive practices. School administrators provide and monitor the use of resources across all school teams, such as: Supplemental materials for core subject areas related to all academic standards; Text sets with differentiated reading levels; Accessible instructional materials, (e.g., textbook set for homework and textbooks with alternate formats: audio/electronic, braille, large print); Assistive technologies, supports and services; Time for instructional planning; and Allocation of personnel aligned with in-class support needs of students (e.g., reading and math coaches, paraprofessionals, therapists). 					ESE Support Facilitators have logs and schedules for students and teachers. Rtl meets weekly and includes staff that are familiar with students.	
		SWDs. Inventory lists available to all staff indicating supple nutes from planning meetings with support personnel, coa				r use with	all students across all content areas and grade	
	Note: Aligns with District BPIE Indicator #5. Within an MTSS, all educators should have access to a variety of resources that include concepts of universal design so that all students have access to a name and can make progress in the general education curriculum.

10.	School administrators use job interview questions to appraise an applicant's knowledge and beliefs pertaining to diversity and inclusive practices, as applicable to the position.	 School interview team members assess applicant responses to ensure a willingness to implement inclusive educational practices, such as collaborative planning and teaching, differentiating instruction, etc. School interview team members include job interview questions for instructional staff that assess knowledge and beliefs of inclusive educational practices, such as: "Please describe your role in a co-taught classroom." "How would you differentiate instruction for students in a mixed-ability classroom, including those on a modified curriculum?" "Tell me how you would respond if a parent of a student with a significant disability inquires about enrolling their child at this school?" School interview team members include job interview questions for non-instructional staff (e.g., paraprofessionals, front office, custodial) that assess knowledge and beliefs of inclusive educational practices, such as: "Tell me how you would respond if a parent of a student with a significant disability inquires about enrolling their child at this school?" School interview team members include job interview questions for non-instructional staff (e.g., paraprofessionals, front office, custodial) that assess knowledge and beliefs of inclusive educational practices, such as:					School interview team includes questions that assess knowledge and inclusive practices and beliefs.		
Suggested Measures: Interview questions used for various positions at the school, including front office staff, cafeteria staff, teachers, paraprofessionals, coaches, etc., include questions related to diversity and effective inclusive practice, as applicable to the position.									
Note: Aligns with District BPIE Indicator #11.

11.	School administrators advocate for all SWDs to be transported to and from school and community-based activities with students without disabilities attending the same school, except for those who have an IEP indicating a shortened school day.	 Administrators review bus arrival and departure procedures for all buses to ensure the safety of all students and identify potential problem areas (e.g, physical access, health and safety measures, adequate supervision for all bus arrivals and departures) All bus arrivals and departures occur at the same time and location for students with and without disabilities. There are designated bus monitors in each school who are responsible for overseeing bus procedures and identifying potential problems. The principal has made a formal request to the district for bus schedules to be changed. Students with and without disabilities attend field trips, community-based career or vocational instruction and school-sponsored trips together. SWDs do not arrive late and leave school early based upon the bus schedule. 					Administrator in charge of transportation reviews the bus arrival and departures times with secretary ans ESE Specialist. AP has made requests to transportation to bus time changes.
	ested Measures: Bus schedules and roster istrict transportation office requesting chang	s, school site map (including bus locations), field trip docu es to bus schedules.	mentation	; documer	ntation of e	emails or o	other communication between school leaders
Note: Aligns with District BPIE Indicator #9. Although school leaders may not have full control over district bus schedules, they can advocate for the district to make changes to schedules so that no students lose academic time on task as a result of scheduled bus service. School leaders can also make requests to the district through work orders that include the construction of curb cuts at school bus drop-off and pick-up locations designated for all buses.

SWD students are included in athletic activities, field trips, dances, etc. Leadership students are involved with SVE classes.	

Suggested Measures: Student schedules, organizational rosters, list of adaptive equipment; observations of students with and without disabilities in non-academic contexts, e.g., recess, in between class and school social gatherings; surveys, focus groups or interviews of students with and without disabilities

Note: Aligns with District BPIE Indicator #21. For many students with disabilities, especially those with more significant disabilities, learning purposeful skills in the context of meaningful and inclusive activities is critical to practicing, maintaining and generalizing what they learn across a range of natural settings and situations. Educators should consider non-academic activities when identifying opportunities to develop essential skills such as using money, ordering food, reading, speaking and asking for assistance when needed in natural contexts, with non-disabled peers. School-sponsored, non-academic activities also provide opportunities for students with significant disabilities to interact and develop relationships with same-age peers without disabilities.

	collaborative planning time is used productively and reflected in general and special education staff schedules and	 planning time for collaborative teaching teams. Administrators provide structures for release time for planning (e.g., floating substitute teachers, duty release). Administrators ensure that teacher duty assignments are distributed across all staff, allowing time for collaborative teachers to plan. The principal schedules time for secondary special education teachers, assigned to different departments (e.g., science, English, history, math) to meet with general education teams to discuss the progress of students they have in common. Monthly PD days are designated for teams (including ESE and general education teachers) to plan and discuss grade-level or subject-area concerns related to curriculum and student interventions. Agendas and logs from collaborative planning sessions are available for administrators to review. There is evidence that lesson plans are developed collaboratively and include shared roles and responsibilities for instruction and assessment. There is a schedule and record of PLCs related to the review of student work and instructional planning. Meeting logs show evidence that student data are reviewed, discussed and used to guide all instructional decisions made by teams during 					planning for all subject areas. There are PLC meetings weekly that administrators attend and participate in. The rotation of meetings includes one week to review student data and discuss any concerns. ESE support staff attends these meetings. The first meeting includes curriculum review, the second meeting is best practices, the third is student data, and the fourth is

18.	Special, electives and career technical education (CTE) teachers have regularly scheduled opportunities to consult with special education teachers and related service providers to implement strategies that support the learning of all SWDs in their classes.	 A music teacher has several SWDs in his classes. A special education teacher is available to observe students during class and discuss accommodations, modifications or other appropriate supports for these students. The physical therapist provides consultation to the physical education (P.E.) coach related to adaptive equipment for students who need mobility supports. The occupational therapist provides guidance to the business education teacher on the use of assistive devices, such as adaptive keyboards, for a student with fine motor support needs. ESE teachers and support services personnel solicit feedback from specials, electives or CTE teachers to determine the effectiveness of instructional accommodations or modifications. The ESE teachers provides guidance and training on the use of assistive technology devices. 					The ESE support facilitators are available for elective teachers to collaborate and observe.

19.	General and special education teachers use the Florida Standards as the foundation for instruction of all SWDs, including those with a significant cognitive disability.	 IEP goals and objectives for all SWDs are aligned to the general education standards. General and special education teachers can articulate what all students need to know, understand and be able to do in relation to the Florida Standards. The instructional goals and learning targets of students with a significant cognitive disability are based on access points. Teachers modify learning goals and instruction for students with a significant cognitive disability using the same, or similar, age-appropriate materials as those used by students without disabilities. 					Teachers use the Florida Standards for all lesson plans. IEP goals are aligned to these standards.
Sugge	ested Measures: Lesson or unit plans, curr	iculum maps, walk-through data, ongoing progress-monito	ring data.				
Note:	For all SWDs, including those who are taking	g alternate assessment, educators should develop learning	goals and	d assess p	rogress to	ward mee	eting those goals based on the Florida Standards.

20.	An MTSS and problem-solving process is consistently used by school personnel to ensure progress in the general education curriculum, across all grades and settings, for all students with and without disabilities.	 School personnel use a problem-solving process to identify appropriate instructional and behavioral interventions. There is a schoolwide plan to provide school personnel with ongoing PD and TA on the implementation of an MTSS framework. Members of the school MTSS team are assigned to provide support to specific grade-level or subjectarea teams. PD and TA activities for implementing MTSS are documented in the SIP, including evaluation criteria to measure desired outcomes. PD and TA activities are provided with the goal of matching tiered supports with the instructional support needs of individual SWDs in general education classrooms and natural contexts. Families are provided information and opportunities to understand the MTSS process as it relates to tiered interventions for their child. Administrators allocate resources to support schoolwide MTSS, functional behavior assessments (FBA) and PBS plans. An FBA process is used to identify triggers and replacement behaviors for any student who needs additional behavioral support. School rules are translated into specific applications for classrooms, hallways and other school areas as part of a schoolwide PBS plan. 					There is PD regarding MTSS and Rtl each month during PSD. The SWBP is provided to all staff.

24.	There is a schoolwide approach for planning and implementing UDL across all instructional and non-instructional school contexts.	 Teachers differentiate instruction to allow multiple means of representation, expression and engagement. Lessons are presented in visual and oral formats. The student responds using eye gaze, choices cards and/or gestures. Appropriate response time is given for SWDs to participate. Instructional technology, matched to the needs of individual students, is effectively used for instruction in all classrooms. Teachers and support personnel use assistive technology for students who need it, including lowtech strategies and high-tech communication systems and software, such as: Book pages equipped with foam tabs for Pre-K students to easily turn pages; A visual schedule that includes items with Velcro for ease of manipulation on the schedule board; Wide classroom aisles to accommodate students with limited mobility; Table heights adjusted to accommodate a wheelchair, a stander or students of short stature; Choice boards or software programs for visual schedules and assignments; Pencil grips; Wood blocks to raise the desk level; Specialized computer software, digital text, iPadsTM, Alpha-SmartsTM or FM systems to ensure meaningful participation in instructional activities; A student with scoliosis is provided with a lab stool with a back so that he can participate fully in instructional activities; and An FM system is provided in class for a student who needs auditory support. Teachers illow students to respond orally on assessments. Teachers involve students with disabilities by regularly using instructional strategies that support more complex thinking rather than watering down the curriculum. 					Lesson plans; observation
Sugge	ested measures: Classroom observation, le	esson plans reflect use of technology/DI and the principles of	DI UDL.				

Note: Creating learning environments using the principals of UDL does not mean teachers water down the curriculum for SWDs. Students with IEPs are expected to know and understand the same concepts as those without disabilities (with varying levels of complexity), through multiple means of representation, action and expression and engagement.

models in place, a to provide instruct	in general education	 Administrators and teachers can articulate different ways to deliver special education services in general education settings. Related services are provided, as appropriate, in general education classes and natural contexts: language therapy is provided to SWDs during reading instruction, physical therapy is provided during P.E. or recess and occupational therapy is provided during writing activities. When developing the school's master schedule, SWDs are scheduled first. The school master schedule reflects a variety of service delivery models used across the school, including co-teaching, support facilitation and consultation. When providing in-class supports, teachers select and use various approaches, such as station teaching, parallel teaching and alternative teaching, based on the needs of the students and the intended outcome(s) of instruction and assessment. Collaborative teachers can explain why they selected a structure for a particular lesson. Collaborative teachers share accountability for coplanning and co-delivering instruction and co-assessing all students. Administrators note and provide feedback on collaborative teaching structures as part of the teacher evaluation system. 					IEP's, Support Facilitator's schedule; master schedule

26.	All paraprofessionals have received PD that includes clear descriptions of their work responsibilities and strategies for providing support to SWDs in general education classrooms and natural contexts.	 Paraprofessionals receive ongoing training on topics relative to their work responsibilities (e.g., the nature of specific disabilities and impact on learning; providing communication, physical, social and academic supports; health, safety and hygiene needs; and confidentiality). Outside resources, such as FIN, FDLRS, and CARD, are procured for the provision of training to paraprofessionals. The roles and responsibilities of paraprofessionals are clearly outlined and communicated by administrators and teachers. The principal ensures dedicated time for paraprofessionals to consult with teachers and be involved in student IEP meetings. Teachers and paraprofessionals discuss strategies and methods to provide individual supports to SWDs in general education classrooms and natural contexts. Administrators and teachers monitor the activities of paraprofessionals to evaluate the effectiveness of supports provided to SWDs. Paraprofessionals can clearly articulate the learning, communication and behavioral support needs of the SWDs they serve. 					job descriptions; paraprofessional schedules; PLC meetings
Sugge	sted Measures: Professional development	logs, pre- and post-assessments, checklists, paraprofession	onal interv	views, job o	descriptior	is, parapr	ofessional schedules.
opport	Note: It is important that paraprofessionals understand how to support learning while using the least intrusive interventions for SWDs. Paraprofessionals should be included in professional learning opportunities and technical assistance relative to their assigned students and job responsibilities. Paraprofessionals' input on student learning (academic, behavioral and social) is critical to planning and implementing appropriate supports as part of the IEP and curriculum team planning processes.

28.	General and special education teachers use regularly scheduled collaborative planning time to clarify their roles and responsibilities while planning effective instruction and assessment for all students.	 Teachers identify and discuss their various roles (e.g., collaborative teaching structures) during the lesson-planning process. When planning, teachers consider the application of UDL and DI as part of every lesson. Teachers determine appropriate accommodations and other supports (e.g., behavior, visual and communication) for individual students. Teachers have consensus on grading procedures, especially when accommodations or modifications are provided for individual students. Teachers share roles and responsibilities such that distinctions between special education and the content- or grade-level teacher are not obvious. Teachers have parity in their roles so that one teacher does not have more responsibility for instruction and assessment than the other. Teachers reflect on and assess their effectiveness as collaborative teachers. Administrators provide ongoing support to assist collaborative teachers in identifying, clarifying and developing their roles and responsibilities. 34.	School uses a team decision-making process to ensure SWDs transition from grade to grade, school to school and district to district to ensure placement in the LRE.	 Supports are in place and are passed seamlessly between sending and receiving parties. Vertical planning between teachers from school to school includes sharing information and effective instructional or behavioral supports for individual students. Administrators proactively ensure that supports follow all SWDs as they transition from grade to grade, school to school and district to district. Structures are in place for the educational and transition teams to communicate and plan postschool opportunities for SWDs. Schools identify and share individual needs of SWDs, through the flexible scheduling process, as they transition for students moving from elementary to middle school or middle to high school, including giving a tour of the building, reviewing important information in the student handbook and orienting students to school procedures. The school provides opportunities and transportation for a student with autism spectrum disorder, transitioning from one school to another, to spend time in the receiving school's classrooms for a week, with appropriate support (e.g., paraprofessional, visual schedule, social supports). 					School meets with feeder schools in the spring to discuss transition to high school; ESE team meets in spring to discuss student needs to transition to following grade; ESE specialist reviews master schedule

School Priority Indicators
35. Based on your team's final indicator ratings, please specify your school's priority indicators by selecting them on the list below. When you have selected your priority indicators, please click on the "Save" button in the toolbar above and email your completed BPIE to your ESE administrator.
1. School analyzes data to identify barriers and initiate improvement steps that increase the number of students in gen. ed.
2. Short and long term improvement efforts are included in the SIP.
3. School has a key person who coordinates and monitors the implementation of inclusive education.
4. School administrators advocate for all SWDs to have the same school choice options as typical peers.
5. School data reflect that all SWDs are educated in gen. ed. contexts 80% or more of the day.
6. School data reflect that all SWDs, ages 3-5, receive special education and related services in regular Pre-K and kindergarten classes.
7. Administrators communicate expectations for all personnel to share responsibility for all students.
8. Administrators facilitate the use of resources to implement best practices for inclusive education.
9. Administrators communicate expectations for all personnel to use person first language.
10. Administrators use job interview questions to appraise an applicant's knowledge and beliefs pertaining to inclusive practices.
11. Administrators advocate for all SWDs to be transported to and from school with typical peers attending the same school.
12. All SWDs have the same opportunities as typical peers to participate in all school-sponsored, non-academic, age-appropriate activities.
13. All SWDs are given equal consideration for recognition through honors, awards, etc.
14. Administrators analyze data to identify staff professional development and technical assistance needs related to inclusion.
15. Administrators facilitate job-embedded professional development on inclusive practices for all school personnel.
16. Administrators facilitate job-embedded, technical assistance on inclusive practices for all school personnel.
17. Administrators ensure collaborative planning time is reflected in general and special educator schedules and instructional plans.
18. Specials, electives, and technical education teachers have regular opportunities to consult with special education teachers.
19. General and special education teachers use the Florida Standards as the foundation for instruction of all SWDs, including those with a significant cognitive disability.
20. A multi-tiered system of student supports and problem-solving process is used for all students with and without disabilities.
21. Instructional and related services personnel use formative assessment to analyze and evaluate data about effective instruction and behavior interventions for SWDs.
22. Teachers of SWDs who spend less than 80% of their day in general education classes use formative assessment data to identify effective instructional and behavioral interventions.
23. There is a school wide approach to facilitate positive, interdependent relationships and social responsibility among all students.
24. There is a school wide approach for planning and implementing Universal Design for Learning.
25. There are a variety of service delivery models in place, across all grade levels, to provide instruction and related services for SWDs in gen. ed.
26. All paraprofessionals receive professional development on ways to support SWDs in gen. ed.
27. All special education teachers are collaborative members of a gen. ed. curriculum team.

28. General and special education teachers regularly plan instruction together.

29. Family members of SWDs are contributing members of school decision-making groups.

30. Learning opportunities and resources are provided to families of SWD.

31. All personnel consider family members as a resource and obtain their input in planning and problem-solving.

32. Reports of progress toward implementing inclusion are disseminated to families, district personnel, and community members annually.

□ 33. School uses a person-centered planning process for SWDs.

34. School uses a team decision-making process to ensure SWDs transition to and maintain placement in the least restrictive environment.

Name and Title of team members completing this BPIE Self Assessment

Michael Warkentien, Assistant Principal Rilo Johnson, Guidance Counselor Sara Pierce, Parent Beth Winterholler, ESE Specialist Hyacinth Lawrence, Teacher
