

Coral Springs High School

Six characteristics that make the **four** critical questions come alive!

Professional Learning Communities (PLC)

To meet today's challenges of globalization, changing work forces, evolving competition, and new technologies, the only hope for building and sustaining momentum in a learning organization requires a fundamental shift in thinking and actions. That shift is authentic PLCs.

1.
Shared mission, vision and values

2.
Collective inquiry

3.
Collaborative teams

4.
Action orientation and experimentation

5.
Continuous improvement

6.
Results orientation

Dufour et al.

- *Focus on learning rather than teaching
- *Work collaboratively
- *Hold yourself accountable for results

In PLCs, the educators shift their focus from what is taught to what is learned.

Critical Questions Of Learning:

1. What do we want each student to learn?
2. How will we know when each student has learned it?
3. How will we respond when a student experiences difficulty in learning?
4. How will we respond when they already know it?

We are... #ColtsUnited

Every PLC participates in an ongoing process of identifying the current level of student achievement, establishing a goal to improve the current level of student achievement, working together to achieve that goal, and providing periodic evidences of progress.
