What Is The School Advisory Council's Job?

The School Improvement and Education Accountability system, which includes School Advisory Councils, sets up priorities and student performance standards that serve as guiding principles for everything the councils do.

Simply put, each School Advisory Council's job is to look at aspects of their school as suggested by the priorities and to come up with a written plan for school improvement.

The council must look at what is known about their school and decide which areas need improvement. An analysis of student achievement and school performance data should occur. Then the SAC must decide which needs are most pressing and most important.

Next, the group will develop strategies – the “how-to” for improving the areas most important to their school. Finally, they will decide how to measure the results of what they plan to do.

What is School Advisory Forum?

(SAF)

School Advisory Forums (SAFs) were created by Broward County Public schools as a venue of communication for parents, teachers, administrators, and community members. The main goals of the School Advisory Forum are information sharing and problem solving.

Information Sharing

The SAF chair attends monthly area meetings to get information from the area, school district, and the community about issues affecting education and the schools. Information from individual schools is shared upward. Area concerns are then brought up to the district advisory level and then presented to the school board when applicable. Information is also looped from the district (advisory and school board) back down to the Areas and then individual schools.
