SUBJECT: **PROMOTION AND RETENTION RATES FOR BROWARD
COUNTY PUBLIC SCHOOLS, 2006-07**

Research Services staff calculated promotion and retention rates for Broward County Public Schools for the 2006-07 school year. These rates were examined to ascertain the trends in student progression over the past three years. Student enrollment in Broward County has decreased during the 2005-06, 2006-07, and 2007-08 school years; however, promotion rates have slightly increased. The following research brief presents promotion data disaggregated by grade level, demographic group, and student performance criteria. Some major findings identified were as follows:

- Fifth grade students registered the highest promotion rates for the 2006-07 school year.
- Black and Hispanic students are closing the promotion gap between White students at the elementary, middle, and high school levels.
- Thirty-nine percent (39.1%) of promoted students in grades 3 through 10 did not score at grade level on the Florida Comprehensive Assessment Test (FCAT-SSS) Reading subtest.
- Nearly thirty percent (29.8%) of promoted students in grades 3 through 10 did not score at or above proficiency on the FCAT-SSS Mathematics subtest.

If you have any questions or comments regarding this data summary, please contact me at 754-321-2470 or Dr. Russell Clement, Director, Research Services at 754-321-2500. This brief can also be obtained from the Research Services Web site (http://www.broward.k12.fl.us/research_evaluation/newmain.htm).

Research Brief

Promotion and Retention Rates for Broward County Public Schools, 2006-07

As part of the District’s monitoring process, Research Services staff calculated promotion and retention rates for Broward County Public Schools for the 2006-07 school year. Promotion and retention rates are influenced by several factors, the major component being policy changes. The Student Progression Plan (Policy 6000.1) states that a student’s progress is based upon classroom work, observations, tests, District and State assessments and other relevant information. The specific District promotion criteria are summarized in Table 1 below; either criteria 1 or criteria 2 must be met for promotion to the next grade level. A more detailed description of Policy 6000.1, including reasons for good cause promotion and criteria for students with disabilities (SWD) and English language learners (ELL) can be obtained online from the Broward County Public Schools Web site (<http://www.broward.k12.fl.us/sbbcpolicies/>).

Table 1
Policy 6000.1 Promotion Criteria by Grade Level

Grade	Criteria 1	Criteria 2
1 2	Students must score at or above the 30 th percentile on the current version of the Stanford Achievement Test in reading comprehension.	Students must score at or above the 30 th percentile on the current version of the Stanford Diagnostic Test in reading comprehension.
3	Students must score at or above achievement level 2 on the FCAT-SSS Reading subtest.	Students must score at or above the 45 th percentile on FCAT-NRT in reading comprehension.
4 5	Students must score at or above achievement level 2 on the FCAT-SSS Reading and Mathematics subtests.	Students must score at or above the 25 th percentile on the FCAT-NRT Reading and Mathematics subtests.
6 7 8	Students must pass a minimum of 4 subjects and score at or above achievement level 2 on the FCAT-SSS Reading and Mathematics subtests.	Students must pass a minimum of 4 subjects and score at or above the 25 th percentile on the FCAT-NRT Reading and Mathematics subtests.
9	Students must earn a minimum of 5 credits.	To be promoted mid-year, students must earn a minimum of 7.5 credits.
10	Students must earn a minimum of 11 credits.	To be promoted mid-year, students must earn a minimum of 13.5 credits.
11	Students must earn a minimum of 17 credits.	To be promoted mid-year, students must earn a minimum of 20.5 credits.

Method

The calculation of promotion rates from the 2006-07 to the 2007-08 school year was restricted to data from students who were enrolled in the District through the end of May 2007 and who were enrolled by the 20th day of the 2007-08 school year. All students in the District who met the enrollment requirement were selected; their grade level in the 2006-07 school year was compared to their current grade level in the 2007-08 school year as of the 20th day. Promotion rates were computed by dividing the number of students who registered increases in grade level from the 2006-07 school year to the 2007-08 school year by the total number of students with enrollment records in both school years. Consequently, all other students in the data set were identified as retained. Students not enrolled in both school years were not included in the analyses. Promotion and retention rates were not computed for 12th grade students due to graduation.

Results

Table 2 displays the District's promotion rates by grade level for the past three school years. The last column shows the difference in promotion rates from the 2004-05 school year through the 2006-07 school year.

Table 2
District Promotion Rates by Grade, 2004-05 to 2006-07

Grade	2004-05			2005-06			2006-07			Prom. Diff. (% pts.)
	<i>N</i>	Promoted		<i>N</i>	Promoted		<i>N</i>	Promoted		
		<i>n</i>	%		<i>n</i>	%		<i>n</i>	%

8	19,692	19,205	97.5	19,063	18,561	97.4	18,540	18,113	97.7	0.2
9	20,680	18,238	88.2	20,302	17,921	88.3	19,932	17,619	88.4	0.2
10	18,501	16,755	90.6	18,536	16,828	90.8	18,500	16,731	90.4	-0.2
11	16,361	15,254	93.2	16,924	15,682	92.7	16,840	15,697	93.2	0.0
Total	213,098	200,672	94.2	207,596	196,309	94.6	203,680	193,021	94.8	0.6

Districtwide promotion rates have increased slightly from 94.2% in 2004-05 to 94.8% in the 2006-07 school year. Promotion rates in the 2006-07 school year ranged from 88.4% in ninth grade to 99.0% in fifth grade. The largest promotion rate increases from 2004-05 to 2006-07 were evidenced in the third, sixth, and seventh grades. Figure 1 illustrates the promotion rate patterns from the 2004-05 to the 2006-07 school year. The three-year trends show that slight decreases in promotion rates were evidenced in grades 1 and 10. Promotion rate increases were realized at every other grade level, with the largest increases in grades 3, 6, and 7. The two-year trends from the 2005-06 to 2006-07 school years show an increase in promotion rates in grades 1, 2, 7, 8, 9, and 11.

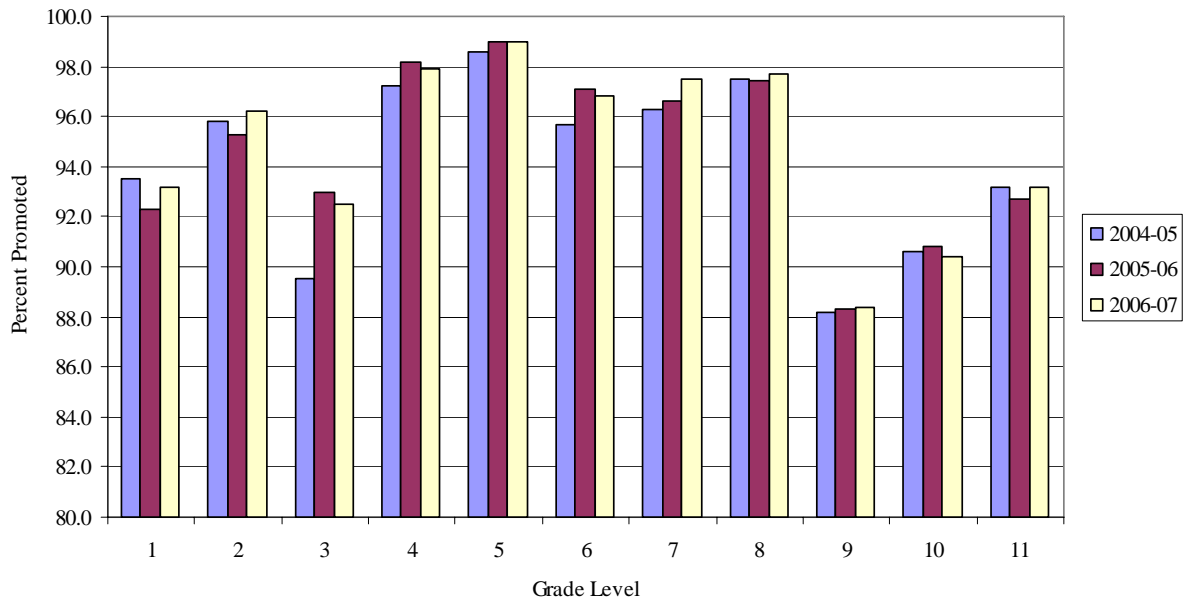

Figure 1. District promotion rates by grade, 2004-05 to 2006-07.

Tables 3 through 7 (pages 5-9) summarize promotion information by demographic group for the 2004-05, 2005-06, and 2006-07 school years for elementary, middle, high, center, and charter schools. The demographic groups listed include ethnicity, gender, ELL status, SWD status, and free or reduced-priced lunch (FRL) status. For elementary, middle, and high schools, female students registered higher promotion rates than male students, and Black students registered the lowest promotion rates, compared to their peers in other ethnic groups for the 2006-07 school year. Still, Black students have registered the largest increase in promotion rates from 2004-05 to 2006-07, among the three major ethnic groups. Consequently, the gap between Black and White students has decreased at the elementary, middle, and high school levels by 0.9, 0.7, and 1.7 percentage points, respectively.

At the elementary school level (Table 3), all demographic groups increased in promotion rates from the 2004-05 to 2006-07 school years with the exception of small decreases by Asian, Multi-Racial, and ELL groups. During the same time period, Black and Hispanic students increased their promotion rates by 1.5 and 1.1 percentage points respectively. Additionally, FRL and SWD students made increases of 1.5 and 1.1 percentage points, respectively.

At the middle school level (Table 4), all demographic groups evidenced promotion rate increases from the 2004-05 to 2006-07 school years. Black, Native American, Male, ELL, SWD, and FRL students all displayed promotion rate increases by more than one percentage point from the 2004-05 to 2006-07 school years. Table 5 shows that Black, SWD, and FRL students at the high school level evidenced increases of two percentage points from the 2004-05 to 2006-07 school years.

FRL	3,204	2,960	92.4	3,483	3,227	92.7	3,951	3,667	92.8

At centers (Table 6), aside from a slight increase in the ELL group, all demographic groups displayed large decreases in promotion rates at center schools from the 2004-05 to 2006-07 school years. The promotion rates at the charter schools (Table 7) remained mostly constant over the past three years. Black students evidenced a small decrease in promotion rate of less than a percentage point from the 2004-05 to 2006-07 school years.

Although several factors contribute to a student's progression to the next grade, the following analyses examine the relationship between Florida Comprehensive Assessment Test (FCAT-SSS) performance and progression. Tables 8 and 9 summarize FCAT-SSS Reading and Mathematics performance for the retained and promoted students in grades 3 through 10 who had FCAT-SSS scores in 2006-07.

Table 8
FCAT-SSS Reading 2006-07 Retained and Promoted Students in Grades 3 through 10

Total	Retained	6,265	4,514	72.1	1,170	18.7	581	9.3
	Promoted	138,366	24,959	18.0	29,112	21.0	84,295	60.9

Over 98% ($n=1,736$) of retained students tested in grades 3 through 5 scored below proficiency on the FCAT-SSS Reading subtest. Retained middle school students accounted for the most proficient scores in reading, amongst the different grade levels. Almost one quarter (24.1%) of retained seventh grade students scored at or above proficiency on the FCAT-SSS Reading subtest. To be promoted at the middle school level, students must pass a minimum of four subjects and score at or above Achievement Level 2 on the FCAT-SSS Reading and Mathematics subtests. Therefore, failing courses was most likely the reason for retention at the

seventh grade level. Less than ten percent (9.3%) of retained students in grades 3 through 10 scored at proficiency on the FCAT-SSS Reading subtest.

Close to 40 percent (39.1%) of promoted students in grades 3 through 10 did not score at proficiency on the FCAT-SSS Reading subtest. Twenty-eight percent ($n=14,338$) of promoted students in grades 3 through 5 did not score at or above proficiency on the FCAT-SSS Reading subtest. It is also important to note that, while reading scores declined substantially in high school, this trend begins at the end of middle school where 19% of students who were promoted at eighth grade scored at Achievement Level 1 on the FCAT-SSS Reading subtest.

Overall, 22.3% ($n=1,379$) of retained students in grades 3 through 10 scored at or above proficiency on the FCAT-SSS Mathematics subtest. Among retained students, the highest mathematics proficiency rates were registered at the ninth and tenth grades. Fifth grade retained students registered the lowest percent of students scoring at proficiency on the FCAT-SSS Mathematics subtest. Almost thirty percent (29.8%) of promoted students in grades 3 through 10 did not score at or above proficiency on the FCAT-SSS Mathematics subtest. Third grade promoted students registered the highest proficiency rates on the FCAT-SSS Mathematics subtest. More than one fifth (21.4%) of sixth grade promoted students scored at Achievement Level 1 on the FCAT-SSS Mathematics subtest.

Next Steps

The attached tables provide school-level summaries of promotion and retention rates for the 2006-07 school year. All reports provide summaries disaggregated by grade level and demographic group. The promotion and retention data are summarized in separate tables by area as indicated below:

- Appendix A: North Area Promotion Rates
- Appendix B: North Central Area Promotion Rates
- Appendix C: South Area Promotion Rates
- Appendix D: South Central Area Promotion Rates
- Appendix E: Charter School Promotion Rates
- Appendix F: North Area Retention Rates
- Appendix G: North Central Area Retention Rates
- Appendix H: South Area Retention Rates
- Appendix I: South Central Area Retention Rates
- Appendix J: Charter School Retention Rates
- Appendix K: Promotion by FCAT-SSS Proficiency

The appendices were designed to assist school staffs with the identification of student groups that need additional assistance in meeting promotion criteria. Analyses were conducted to identify schools and student groups within each grade level that registered low promotion rates or high retention rates. Groups with promotion rates more than two standard deviations below the mean for a given grade level were highlighted in elementary, middle, high, and charter schools. Highlights were not provided for centers due to high variability in the data at that level. Because this analysis was designed to compare promotion rates within grade levels, the two standard deviation criteria encompasses different ranges of promotion rates for each grade level. Hence, the ranges of promotion rates highlighted vary across grade levels. Additionally, Appendix K provides a summary of FCAT-SSS Reading and Mathematics performance by school for the students who were promoted. Schools where more than 50% of the promoted students were not proficient in Reading or Mathematics were highlighted. Staffs should compare their school data with the Districtwide data summarized in Tables 2 through 8. The disaggregated data can be consulted to determine which, if any, segments of a school's student population are having difficulty meeting promotion standards. District information resources, such as the Virtual Counselor and Data Warehouse reports, can be used to identify retained students and access diagnostic information to ensure that academic deficiencies are addressed.
