Research, Evaluation, Assessment & Boundaries

VIA: Frank Till
Superintendent of Schools

SUBJECT: **2004 RESULTS OF THE SCHOOL READINESS UNIFORM SCREENING
SYSTEM (SRUSS)**

The Florida Department of Education (FDOE) has released the results of the 2004 administration of the School Readiness Uniform Screening System (SRUSS). The 2004-05 school year is the third year of implementation of the SRUSS, which is given annually to all kindergarten students entering public school for the first time during the first 30 days of school. The SRUSS is comprised of two instruments: a developmental screening assessment, the Early Screening Inventory-Kindergarten (ESI-K), and a measure of early literacy skills, the Dynamic Indicators of Basic Early Literacy Skills (DIBELS). Please note that prior to the 2004-05 administration, the SRUSS was comprised of the ESI-K and a behavioral screening measure based on teacher observation, the Work Sampling System (WSS). The behavioral screening measure has been discontinued for use during the 2004-05 administration and was replaced with the DIBELS in all districts in the state of Florida. The conversion from WSS to DIBELS reflects FDOE's increasing focus on school readiness.

DIBELS is made up of a set of standardized, individually administered measures of early literacy development. These are short (one minute) fluency measures designed to regularly monitor the development of pre-reading and early reading skills. Each measure has been thoroughly researched and demonstrated to be reliable and valid indicators of early literacy development. They are also predictive of later reading proficiency and aid in the early identification of students who are not progressing as expected.

Please note that, although FDOE has recently released the State, district, and school summary data from the 2004 SRUSS administration, individual student results have been available to teachers since the time of the test administration, as these tests are scored immediately after testing by the administrator and the score sheets provide all of the information needed to report on a student's performance. Teachers are encouraged to use the data obtained through the SRUSS screening instruments to inform parents of their child's performance and areas of strength and need. Nonetheless, FDOE emphasizes that it is important for teachers and parents

2004 SRUSS Results

April 26, 2005

Page 2 of 4

to understand that the SRUSS screening instruments are not detailed diagnostic tools, nor are they predictive of future performance on other assessments. However, FDOE does recommend that if a child's score on the ESI-K is in the "Not Ready Yet" category AND administration of the DIBELS identifies the student's status as High Risk, a specific academic improvement plan may be needed. In Broward County, these students are monitored through ongoing informal assessments in the kindergarten classroom, and teachers implement appropriate interventions and specialized instructional strategies to assist students in developing the necessary skills.

The FDOE memorandum titled "Results of 2004 Administration – School Readiness Uniform Screening System (SRUSS)" and State Report of District Results are attached. Broward results are found on page 2 of the report and compare favorably to the State distribution. As can be seen in Table 1 below, results of the ESI-K indicate that 88% of Broward students entering kindergarten in the fall of 2004 were considered ready for school at that time, as compared to 84% of students around the State. Also displayed in Table 1, are the results of the 2002-03 and 2003-04 administrations of the ESI-K. When the percentages of students in each category are compared from 2003-04 to 2004-05, it can be seen that a slightly higher proportion of students fell within the "Ready Now" category at the District level. At the same time, the percentage of Broward students falling within the "Getting Ready" category was reduced slightly while the percentage of students falling within the "Not Ready Yet" category remained stable.

Table 1. ESI-K Results*

		Number Reported	Percent <i>Ready Now</i>	Percent <i>Getting Ready</i>	Percent <i>Not Ready Yet</i>
Broward	2002-03	16,791	86	10	3
	2003-04	18,021	87	10	3
	2004-05	17,901	88	9	3
State	2002-03	157,939	82	13	5
	2003-04	169,972	84	12	4
	2004-05	175,806	84	12	5
*Due to rounding procedures, sums of percentages may not equal 100%.					

The classification of "Ready Now" reflects that the development and abilities of the student were consistent with age-level expectations at the time of entry to kindergarten. The classification of "Getting Ready" indicates the student's performance was inconclusive at the time of testing and there may have been other factors that influenced the outcome of the screening. It is recommended that these students be re-screened. The classification of "Not Ready Yet" indicates the student was not demonstrating age-appropriate development at the time of testing and is intended to alert teachers to consider implementing strategies to bridge the developmental gap for this child.

Also attached is the District Report of School Results. Analysis of this report reveals:

- Of the 150 Broward elementary schools reporting results, 105 (70%) performed at or above the State average in terms of percentage of students ready for school at the beginning of kindergarten (2004 State average = 84% ready for school). In comparison, in 2003-04, 66% of Broward schools (95 of 144) performed at or above the State average in terms of percentage of students ready for school at the beginning of kindergarten. Please note the State average in 2003 was also 84% of students identified as ready for school.

- Notably, of the 45 schools in Broward County performing below the State average in terms of the percentage of students ready for school at the beginning of kindergarten in 2004-05, 38 (84%) are schools receiving Title I services, a federally-funded program for economically disadvantaged children.

DIBELS Letter Naming Fluency (LNF) is a standardized, individually administered test that provides a measure of early literacy. Students are presented with upper- and lower-case letters arranged in a random order and are asked to name as many letters as they can. Students are told if they do not know a letter they will be told the letter. The student is allowed 1 minute to produce as many letter names as he/she can, and the score is the number of letters named correctly in 1 minute. DIBELS Initial Sound Fluency (ISF) is a standardized, individually administered measure of phonological awareness that assesses a child's ability to recognize and produce the initial sound in an orally presented word. The examiner presents four pictures to the child, names each picture, and then asks the child to identify (i.e., point to or say) the picture that begins with the sound produced orally by the examiner. The child is also asked to orally produce the beginning sound for an orally presented word that matches one of the given pictures. The examiner calculates the amount of time taken to identify/produce the correct sound and converts the score into the number of onsets correct in a minute. The ISF measure takes about 3 minutes to administer and has over 20 alternate forms to monitor progress.

Based on the child's performance on each of these measures, the "risk level" of the child is determined. Scores for both measures are reported in the following categories:

- Above Average (AA) – the child's performance was at or above the 60th percentile
- Low Risk (LR) – the child's performance was at grade level
- Moderate Risk (MR) – the child's performance was moderately below grade level and additional intervention is needed
- High Risk (HR) – the child's performance was seriously below grade level and substantial intervention is needed

Table 2 displays the results of the DIBELS for Broward County and the State.

Table 2. Dynamic Indicators of Basic Early Literacy (DIBELS)*

	Letter Naming Fluency			Initial Sounds Fluency		
	Number Reported	Status	Percent	Number Reported	Status	Percent
Broward	17,875	AA	60	17,913	AA	43
		LR	14		LR	20
		MR	13		MR	19
		HR	13		HR	18
Florida	175,023	AA	48	174,913	AA	39
		LR	15		LR	19
		MR	17		MR	20
		HR	20		HR	22

*Due to rounding procedures, sums of percentages may not equal 100%.

As seen in Table 2, Broward results compare favorably to the State distribution. In the area of Letter Naming Fluency, 60% of Broward's students scored in the Above Average range compared to 48% across the State. In Initial Sounds Fluency, Broward results exceeded the State results to a smaller degree, with 43% scoring in the Above Average range as compared to 39%

across the State. As this is the first year of administering DIBELS, only one year of data is reported. Each year additional data will be reported to study trends.

In conclusion, it is clear that information derived from the SRUSS is intended to serve multiple purposes. First, it is designed to assist teachers in understanding the abilities of children entering school and informs instruction for struggling students. In addition, information derived from the screening system is expected to aid educators in curriculum planning and improving school readiness programs and services for preschool-age children. To this end, the District departments of Primary Education and Child Development Services are continuing to work in close cooperation, beginning the process of analyzing data gleaned from the 2002-03, 2003-04 and 2004-05 administrations of the SRUSS, tracking students longitudinally, and working towards alignment of assessment tools and curriculum for preschool and primary education programs. Collaboration between these departments will enable educators to link the skills, which will help prepare students to become successful learners in preschool, kindergarten, first grade, and beyond.

This memorandum and the attached documents can be accessed on the Student Assessment & School Performance website at <http://www.broward.k12.fl.us/studentassessment/reports.htm>. If you have any question regarding this release please feel free to contact **me at (754) 321-2470 or Kimberley Kraft, Director of Student Assessment & School Performance, at (754) 321-4257.**

Early Screening Inventory - Revised (ESI-K)

Total ESI-K scores are calculated using teacher ratings of 19 activities performed by students in 5 developmental areas. Practice items and Speech Development (Section IV) tasks are not included in these totals. Total ESI-K scores can be interpreted as shown in the table to the right.

ESI-K Scoring Table

Age Range	Not Ready Yet	Getting Ready	Ready Now
4.6 - 4.11	9 or less	10 - 13	14 or more
5.0 - 5.5	13 or less	14 - 17	18 or more
5.6 - 5.11	15 or less	16 - 20	21 or more
unknown	9 or less	10 - 20	21 or more

Dynamic Indicators of Basic Early Literacy Skills (DIBELS)

Letter Naming Fluency

Letter Naming Fluency measures a child's proficiency in naming uppercase and lowercase letters. Children are presented with a page containing letters in random order and are asked to name as many letters as possible within one minute.

Letter Naming Fluency Scoring Table

Number Correct per Minute	Status	Description
0 - 1	High Risk (HR)	Seriously below grade level and in need of substantial intervention
2 - 7	Moderate Risk (MR)	Moderately below grade level and in need of additional intervention
8 - 16	Low Risk (LR)	At grade level
17 +	Above Average (AA)	At or above the 60th percentile

Initial Sounds Fluency

Initial Sounds Fluency determines a child's ability to recognize the beginning sound(s) in an orally presented word. Children are shown pictures of objects and asked to identify the picture that begins with the sound the examiner presents. Children are also asked to produce the beginning sound for an orally presented word that matches one of the pictures.

Initial Sounds Fluency Scoring Table

Score	Status	Description
0 - 3	High Risk (HR)	Seriously below grade level and in need of substantial intervention
4 - 7	Moderate Risk (MR)	Moderately below grade level and in need of additional intervention
8 - 11	Low Risk (LR)	At grade level
12 +	Above Average (AA)	At or above the 60th percentile
