SUBJECT: **2005-06 RESULTS OF THE SCHOOL READINESS UNIFORM SCREENING SYSTEM (SRUSS)**

The Florida Department of Education (FDOE) has released the results of the 2005 administration of the School Readiness Uniform Screening System (SRUSS). The 2005-06 school year is the fourth year that the SRUSS has been administered in Florida. The SRUSS, given to all kindergarten students entering public school for the first time during the first 30 days of school, is comprised of two instruments: a developmental screening instrument, the Early Screening Inventory-Kindergarten (ESI-K), and, as instituted in 2004-05, the Dynamic Indicators of Basic Early Literacy Skills (DIBELS).

The ESI-K is an on-demand developmental screening instrument that is administered individually to each child and provides an overview of development in three areas: visual-motor/adaptive, language and cognition, and gross motor skills. The ESI-K results for each child yield an overall measure of the student's readiness for kindergarten and are reported as falling into one of three categories: "Ready Now," "Getting Ready," and "Not Ready Yet." The classification of "Ready Now" indicates that the development and abilities of the student were consistent with age-level expectations at the time of entry to kindergarten. The classification of "Getting Ready" indicates the student's performance was inconclusive at the time of testing and there may have been other factors that influenced the outcome of the screening. It is recommended that these students be re-screened. The classification of "Not Ready Yet" indicates the student was not demonstrating age-appropriate development at the time of testing and is intended to alert teachers to consider implementing strategies to bridge the developmental gap for this child.

The DIBELS is a set of standardized, individually administered measures of early literacy development. They are designed to be short (one minute) fluency measures used to regularly monitor the development of pre-reading and early reading skills. Each measure has been thoroughly researched and demonstrated to be a reliable and valid indicator of early literacy development and predictive of later reading proficiency, thereby aiding in the early identification of students who are not progressing as expected. For the purposes of the SRUSS, the first two measures of the DIBELS are utilized: Letter Naming Fluency, measuring the child's proficiency in naming upper and lowercase letters, and

Initial Sounds Fluency, assessing the child's ability to recognize the beginning sounds of an orally-presented word. The results of each measure of the DIBELS are reported as falling into one of four categories that describe the risk level for the child related to difficulty achieving early literacy benchmark goals, defined as "above average," "low risk," "moderate risk," and "high risk." The classification of Above Average (AA) reflects that the child's performance was at or above the 60th percentile, the classification of Low Risk (LR) reflects that the child's performance was at grade level, the classification of Moderate Risk (MR) reflects that the child's performance was moderately below grade level and additional intervention is needed, and the classification of High Risk (HR) reflects that the child's performance was seriously below grade level and substantial intervention is needed.

Please note that although the FDOE has recently released the State, district, and school summary data from the 2005 SRUSS administration, individual student results have been available to teachers since the time of the test administration, as these tests are scored immediately after testing by the administrator and the score sheets provide all of the information needed to evaluate each student's performance. Teachers are encouraged to use the data obtained through the SRUSS instruments to inform parents of their child's readiness for kindergarten and areas of strength and need. The FDOE emphasizes that it is important for teachers and parents to understand that the SRUSS screening instruments are not detailed diagnostic tools, nor are they predictive of future performance on other assessments. However, the FDOE does recommend that if a child's score falls into the "Not Ready Yet" category on the ESI-K AND administration of the DIBELS identifies the student's status as "High Risk," a specific academic improvement plan may be needed. In Broward County, these students are monitored through ongoing informal assessments in the kindergarten classroom, and teachers implement appropriate interventions and specialized instructional strategies to assist students in developing the necessary skills.

The FDOE memorandum titled "Results of 2005 Administration – School Readiness Uniform Screening System (SRUSS)" and the State Report of District Results are attached. Broward results are found on page 2 of the report and compare favorably to the State distribution. As noted in Table 1 and Figure 1, results of the ESI-K indicate that 86 percent of Broward students entering kindergarten in the fall of 2005 were considered ready for school at that time, while 82 percent of students entering kindergarten across the State were ready. Also displayed in Table 1 are the results of the 2003-04 and 2004-05 administrations of the ESI-K. When the percent of students in each category are compared from 2004-05 to 2005-06, a decline of two percentage points among students identified as ready for school at the time of entry to kindergarten is noted both in Broward and across the State. At the same time, the percentage of students falling within the "Getting Ready" category increased slightly, as did the percentage of students falling within the "Not Ready Yet" category in Broward County.

Table 1: ESI-K Results 2003-04 through 2005-06*.

		Number Reported	<i>Ready Now</i>	<i>Getting Ready</i>	<i>Not Ready Yet</i>
Broward	2003-04	18,021	87%	10%	3%
	2004-05	17,901	88%	9%	3%
	2005-06	17,946	86%	10%	4%
Florida	2003-04	169,972	84%	12%	4%
	2004-05	175,806	84%	12%	5%
	2005-06	181,742	82%	13%	5%

*Due to rounding procedures, sums of percentages may not equal 100%.

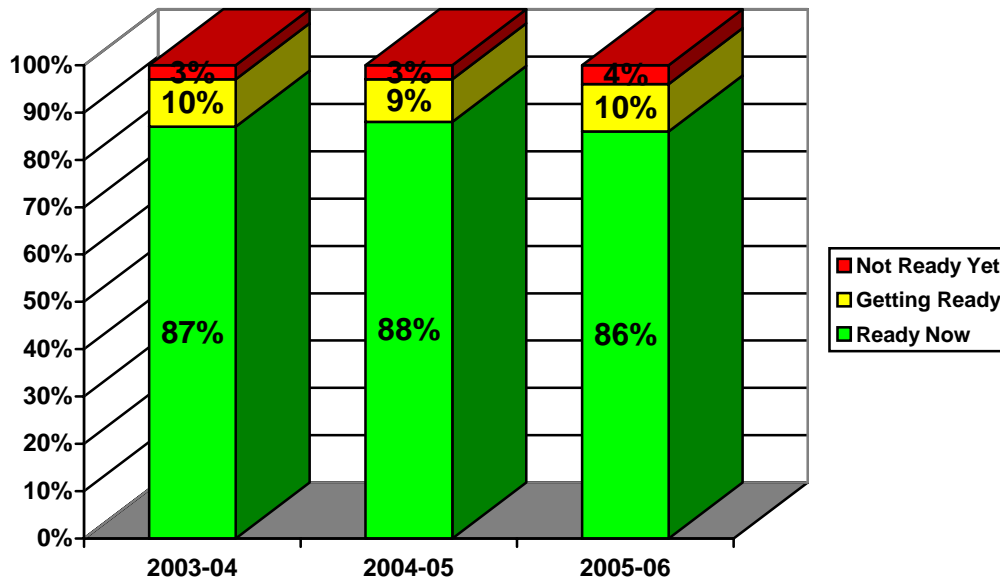

Figure 1: ESI-K Results 2003-04 through 2005-06.

Also attached is the District Report of School Results. Analysis of this report reveals:

- Of the 152 Broward elementary schools reporting results, 106 (70%) performed at or above the State average in terms of percentage of students ready for school at the beginning of kindergarten (State average = 82% ready for school). A decline of two percentage points in the proportion of students identified as Ready Now is noted in Broward, matching the two point decline statewide.
- Notably, of the 46 schools in Broward County performing below the State average in terms of percent of students ready for school at the beginning of kindergarten in 2005-06, 38 (83%) are schools receiving Title I services, a federally-funded program for economically disadvantaged children.

With regard to the two DIBELS measures, Letter Naming Fluency and Initial Sounds Fluency, results for students in Broward County again compare favorably to the state distribution. Tables 2 and 3 display the DIBELS results for Broward County and the State, and Figures 2 and 3 display the DIBELS results for Broward. As this is the second year that the DIBELS measures were included as part of the SRUSS administration, only two years of data are reported. As noted in Table 2, this year in the area of Letter Naming Fluency, 61% of Broward's students scored in the Above Average category compared to 50% of students across the state. Furthermore, only 14% of students in Broward were considered to be high risk as assessed by the DIBELS Letter Naming Fluency measure, as compared to 19% of students statewide. As noted in Table 3, this year in the area of Initial Sounds Fluency, 45% of Broward students scored in the Above Average category, as compared to 41% of students across the state. When 2005-06 results are compared with data from the 2004-05 school year, increases are noted in the percent of students scoring in the Above Average category in Broward and across the state on both of the DIBELS measures.

		HR	22		HR	20	

*Due to rounding procedures, sums of percentages may not equal 100%.

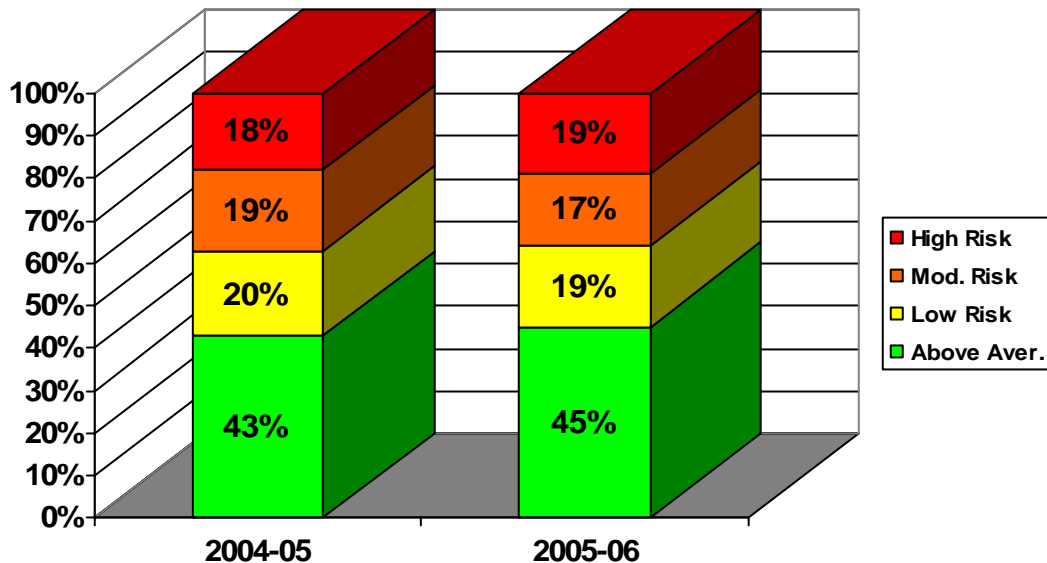

Figure 3: DIBELS Initial Sounds Fluency Results 2004-05 and 2005-06.

An analysis of the attached District Report of School Results reveals that out of 153 Broward schools reporting DIBELS results:

- 116 schools (76%) performed at or above the State average in terms of percentage of students scoring Above Average in Letter Naming Fluency.
- Of the 37 schools performing below the State average in Letter Naming Fluency, 34 (92%) are schools receiving Title 1 services.
- 84 schools (55%) performed at or above the State average in terms of percentage of students scoring Above Average in Initial Sounds Fluency.
- Of the 69 schools performing below the State average in Initial Sounds Fluency, 50 (72%) are receiving Title 1 services.

In conclusion, information derived from the SRUSS is intended to serve multiple purposes. First, it is designed to assist teachers in understanding the developmental level and early literacy skills of children entering kindergarten and inform instruction for struggling students. In addition, information derived from the screening system is expected to aid educators in curriculum planning and improving school readiness programs and services for preschool-age children. To this end, the District departments of Primary Education and Child Development Services continue to work in close cooperation, analyzing data gleaned from each administration of the SRUSS beginning in 2002-03, tracking students longitudinally, and working towards alignment of curriculum and assessment tools for preschool and primary education programs. Collaboration between these departments will better enable educators to prepare students to become successful learners in preschool, kindergarten, first grade, and beyond.

Future administrations of the SRUSS will likely include different assessment tools than those currently utilized. Legislation enacted in 2005 requires that the Florida Department of Education (FDOE) adopt a statewide kindergarten screening that assesses the readiness of each student for kindergarten based on

the performance standards for the Voluntary Pre-Kindergarten (VPK) program beginning in the 2006-07 school year. Because the performance standards for VPK differ from the developmental skills assessed by the ESI-K, the FDOE will likely adopt a new assessment tool to replace the ESI-K for the fall of 2006; however, the DIBELS is expected to remain a component of the SRUSS due to its value as a research-based indicator of early literacy development and predictor of later reading proficiency. The new kindergarten screening will be designed to provide objective data concerning each student's progress in attaining the VPK performance standards and readiness for kindergarten, and results of the screening will be used by the FDOE to annually calculate each VPK provider's "kindergarten readiness rate. The kindergarten readiness rate will be used to evaluate the effectiveness of each VPK program provider, including private provider and public school pre-kindergarten programs. By this mechanism, VPK providers will be held accountable for the effectiveness of their programs in preparing students for kindergarten, and programs that fail to adequately prepare students for kindergarten will be sanctioned on a progressive basis. Further information regarding the revised SRUSS and accountability for VPK programs is expected to be forthcoming from the FDOE in the summer of 2006.

Early Screening Inventory - Revised (ESI-K)

Total ESI-K scores are calculated using teacher ratings of 19 activities performed by students in five developmental areas. Practice items and Speech Development (Section IV) tasks are not included in these scores.

ESI-K Scoring Table

Age Range	Not Ready Yet	Getting Ready	Ready Now
4.6 - 4.11	9 or less	10 - 13	14 or more
5.0 - 5.5	13 or less	14 - 17	18 or more
5.6 - 5.11	15 or less	16 - 20	21 or more
unknown	9 or less	10 - 20	21 or more

Dynamic Indicators of Basic Early Literacy Skills (DIBELS)

Letter Naming Fluency

Letter Naming Fluency measures a child's proficiency in naming uppercase and lowercase letters. Children are presented with a page containing letters in random order and are asked to name as many letters as possible within one minute.

Letter Naming Fluency Scoring Table

Number Correct per Minute	Status	Description
0 - 1	High Risk (HR)	Seriously below grade level and in need of substantial intervention
2 - 7	Moderate Risk (MR)	Moderately below grade level and in need of additional intervention
8 - 16	Low Risk (LR)	At grade level
17 +	Above Average (AA)	At or above the 60th percentile

Initial Sound Fluency

Initial Sound Fluency determines a child's ability to recognize the beginning sound(s) in an orally presented word. Children are shown pictures of objects and asked to identify the picture that begins with the sound the examiner presents. Children are also asked to produce the beginning sound for an orally presented word that matches one of the pictures.

Initial Sound Fluency Scoring Table

Score	Status	Description
0 - 3	High Risk (HR)	Seriously below grade level and in need of substantial intervention
4 - 7	Moderate Risk (MR)	Moderately below grade level and in need of additional intervention
8 - 11	Low Risk (LR)	At grade level
12 +	Above Average (AA)	At or above the 60th percentile
