Interim Superintendent of Schools

**SUBJECT: VOLUNTARY PRE-KINDERGARTEN (VPK) PROVIDER
KINDERGARTEN READINESS RATES**

Today, the Florida Department of Education released the Voluntary Pre-Kindergarten (VPK) Provider Kindergarten Readiness Rates for children who participated during the 2005-06 school year. All VPK students, whether served at a public or private school, must submit to the Florida Kindergarten Readiness Screener (FLKRS), which was administered for the first time in August 2006 (for detailed information on the FLKRS, please see the January 8, 2007 memorandum available at: <http://www.broward.k12.fl.us/studentassessment/AssessmentReleases.htm>).

The FLKRS consists of a subset of the Early Childhood Observation System (ECHOS), an observational instrument that is used to monitor skills, knowledge, and behaviors a student demonstrates or needs to develop; and two probes assessing initial sounds and letter naming culled from the Dynamic Indicators of Basic Early Literacy Skills (DIBELS) instrument. A readiness index was computed for each provider by adding the ECHOS and DIBELS scores. The resulting ratings for each VPK provider in Broward County are listed in the attached table. The State Board of Education is scheduled to set the minimum provider readiness rate at their June 19, 2007 meeting.

A preliminary analysis of all VPK providers in Broward County revealed that students served by public schools and private providers registered equal overall levels of readiness. The average readiness rate registered during the regular 2005-06 school year by the 21 public schools was 247 and by the 264 private providers was 248, with scores ranging from 160 to the maximum score of 300, and well above the state average of 240. During the summer of 2006, 13 public schools registered an average readiness rate of 246, compared with a readiness rate of 237 among 46 private providers. Readiness rates were not provided for an additional 60 providers (five of which were public schools) due to insufficient numbers of students served and/or assessed.

VOLUNTARY PRE-KINDERGARTEN (VPK) PROVIDER READINESS RATES

May 15, 2007

Page 2

A second analysis was conducted to examine the relative standing of VPK providers in Broward compared to all providers statewide. The results of this analysis indicated that the readiness rates registered by Broward's providers tended to be higher than the readiness rates of providers statewide. Moreover, Broward's public school providers were more likely than private providers to register readiness rates in the top range of schools. Specifically, 35% ($n=12$) of Broward's public school providers registered readiness rates in the top statewide quartile, compared with 30% ($n=92$) of the private providers (25% is the expected proportion to be contained within a quartile). In contrast, only 18% ($n=6$) of Broward's public school providers and 19% ($n=58$) of private providers registered readiness rates in the bottom quartile. North Fork Elementary was the only public school among five providers to register the maximum readiness rate of 300. As the list of providers is examined, care must be taken during interpretation as many locations served small numbers of students. Questions or concerns about these data should be addressed to **me** or to **Dr. Russell Clement, Director, Student Assessment & School Performance at 754-321-4257.**
