Student Grid Sheet

Test Invalidation
TEST INVALIDATION

There are bubbles for one or two content areas, depending on the grade level tested:

Answer Document Containing Two Tests

Answer Document Containing One Test

TEST INVALIDATION

The DNS Bubble MUST be gridded on a USED document if:

- A test MUST be invalidated if any of the following circumstances occur:
  1. A student has an electronic device during testing.
  2. A student is cheating during testing.
  3. A student is disruptive during testing.

Situations involving possession of electronic devices, possible cheating, or disruptive behavior should be investigated and discussed with the school assessment coordinator and site administrator before a final invalidation decision is made.

Possible Test Invalidation

A test MAY be invalidated if any of the following circumstances occur:

1. A student becomes ill and is unable to finish, OR a student is not allowed the correct amount of time.
2. A student was given an accommodation not allowed on the FCAT.
3. A student was given an accommodation not on the student's IEP, Section 504 plan, or LEP plan.
4. A student was not given an allowable accommodation listed on the student's IEP, Section 504 plan, or LEP plan.
5. An error occurs in test administration or procedures that could compromise the validity of the test results (e.g., students had access to an unauthorized visual aid that gave an unfair advantage).
Do NOT Invalidate

1. Student withdrew before starting a test
2. Student absent for a session or the entire testing window
3. Unused defective answer document
4. Unused incorrect preidentified information

Package for return with NOT TO BE SCORED materials.
Do NOT attempt to remove an affixed label.

Defective Materials

If a defective test book is identified before testing, give the student a replacement test book.
Return defective books with the NOT TO BE SCORED materials.
If a student discovers he/she has a defective test book during testing, give the student a replacement test book with the same form code.
If the same form code book is not available, give the student a book with any form code, and bubble the replacement form code on the student grid sheet.

Defective Test Books
Defective Answer Documents
(Answer Folder, Answer Book, or Test and Answer Book)

The DNS bubble **MUST** be gridded if any of the following circumstances occur:

1. The document is defective and USED.
2. A student name, student ID number, district number, school number, or grade level (except for Retake documents) is INCORRECT on a label affixed to a USED document.
3. A student label has been placed over another student label on a USED document.

If any of the above issues happen **during** testing, give the student a replacement document. When the student completes the session, by the test administrator, under the supervision of the test administrator, transfer the exact responses from the defective document to the replacement.

---

Defective Answer Documents (continued)
(Answer Folder, Answer Book, or Test and Answer Book)

- Under the following circumstances, it is **NOT** necessary to grid the DNS bubble if the document has been packaged properly for return with all other **NOT TO BE SCORED** materials:
  1. Preidentified document belongs to a student who has withdrawn before testing begins.
  2. Preidentified document belongs to a student who has been absent during the entire testing window.
